Rolling stock Maintenance Equipment

Rolling stock Maintenance Equipment

INNDES: a skilled resource in Italy, a worldwide player in the railway sector

Inndes, founded in 2006 with headquarters in Vicenza, Italy, is an Engineering, Consultancy, Manufacture and Procurement Company specialist in the **ROLLING STOCK MAINTENANCE** operation, both for high speed trains, light rails, tram lines and metro.

Inndes offers specific solutions for new rail workshops and for restructuring obsolete workshops through the definition of the most appropriate lay-out to fit to new demands of managing maintenance operations.

As a process-oriented company, our key factors lie in the deep knowledge of the industrial sector of the rail maintenance, in the design and value engineering activities combined with years of experience and innovation of products and processes.

A Company dedicated to producing customized technological solutions in the Rail Maintenance operation, with respect to cost, effectiveness, quality, dates, reliability and service.
